

Terminal Management Solution (TMS)

Modernize your facilities and streamline operations with FuelFACS™

Complete terminal support

TechnipFMC's end-to-end terminal management solution for measurement, accounting and control allows customers to manage and optimize all their facilities from one single integrated interface. Our terminal management systems are based on TechnipFMC's scalable FuelFACS™ and smart, reliable measurement equipment; improving terminal throughput, increasing premises and data security and providing traceable and accurate measurement data.

Along with excellent global support, our solutions can be applied to marine, pipeline and terminal applications to help you understand the health of your facilities and optimize the transportation and storage of energy products across the downstream value chain for faster and safer product delivery.

Our services

- ▶ Turnkey terminal automation services
- ▶ Cybersecurity consultation
- ▶ ERP integration
- ▶ Lifecycle services

Our value proposition

Improve terminal throughput

Accurate billing and inventory

Premises and data security

Traceable and accurate measurement data

End-to-end solutions for downstream applications

From individual product components to complete skid-mounted load rack packages we have the right solution to meet your application needs.

Marine

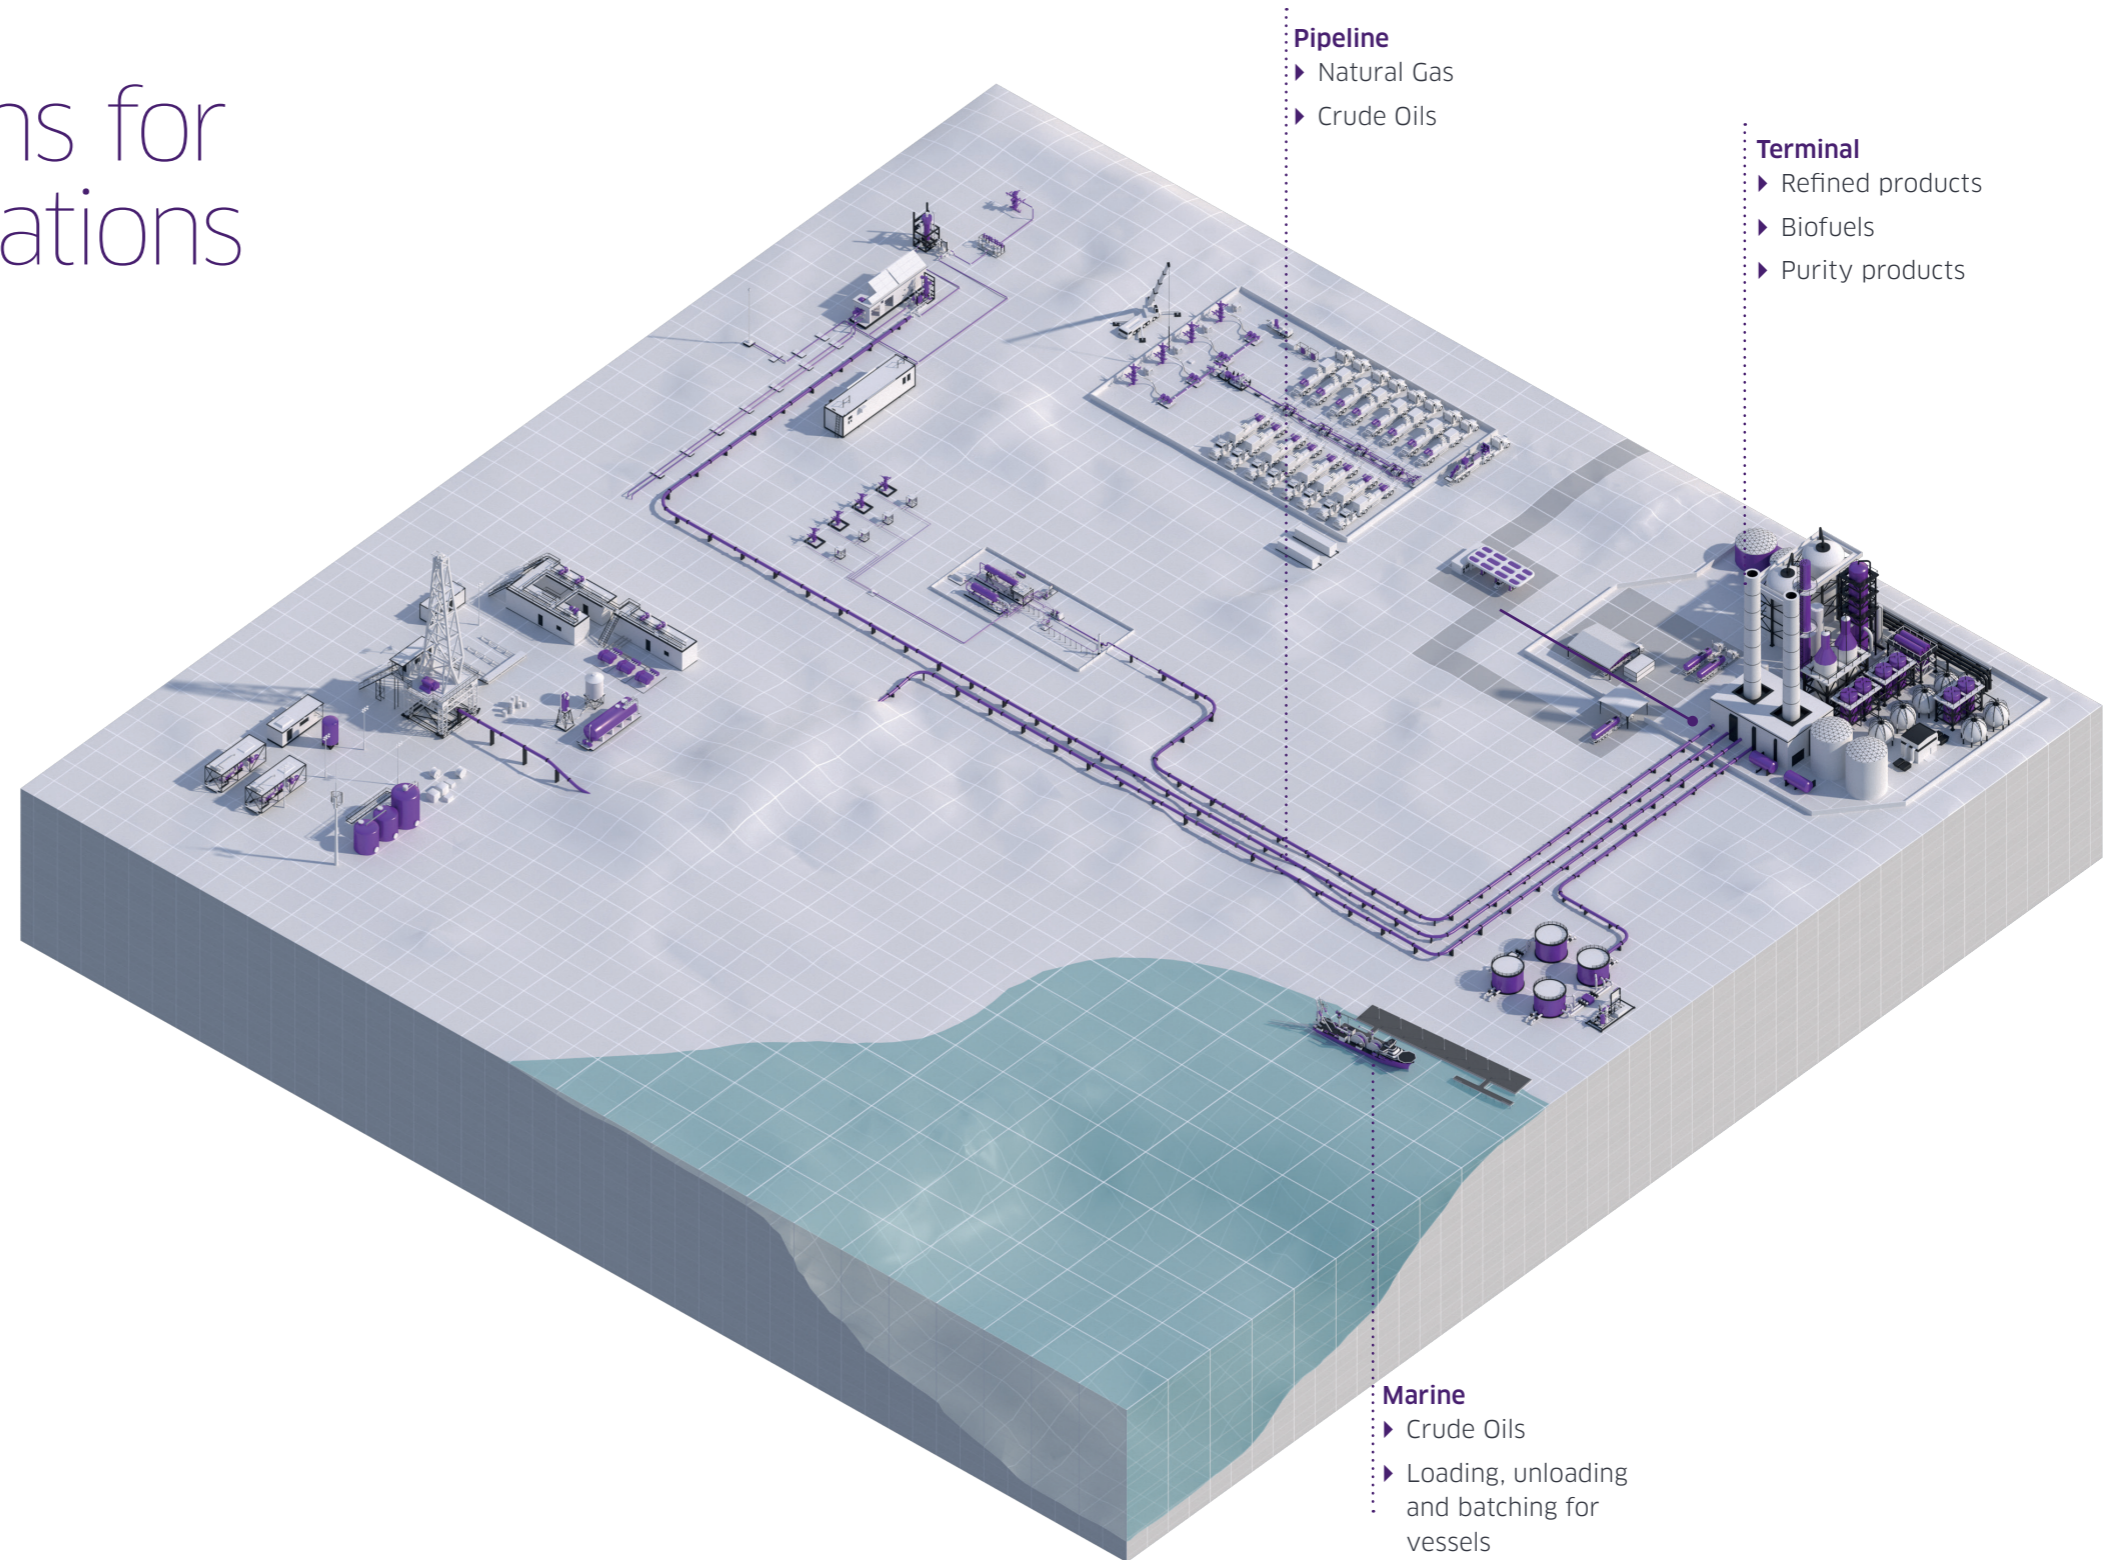

Accurately track the movement of energy product from the vessel to the next stage in its journey for increased data visibility and efficiency in the supply chain

Pipeline

Improve the health and efficiency of your pipeline with traceable and accurate measurement data. FuelFACS optimizes the transportation of your products for faster and safer delivery

Terminal

By streamlining terminal operations you can improve throughput and increase premises and data security at all your facilities.

Use the right solution to automate your facilities

Manage and optimize all your facilities from one single integrated interface.

FuelFACS OnPrem

Our field proven FuelFACS OnPrem combines facility business systems and central business systems to give you a clear understanding of your facility operations through a complete set of enterprise wide controls.

FuelFACS OnDemand

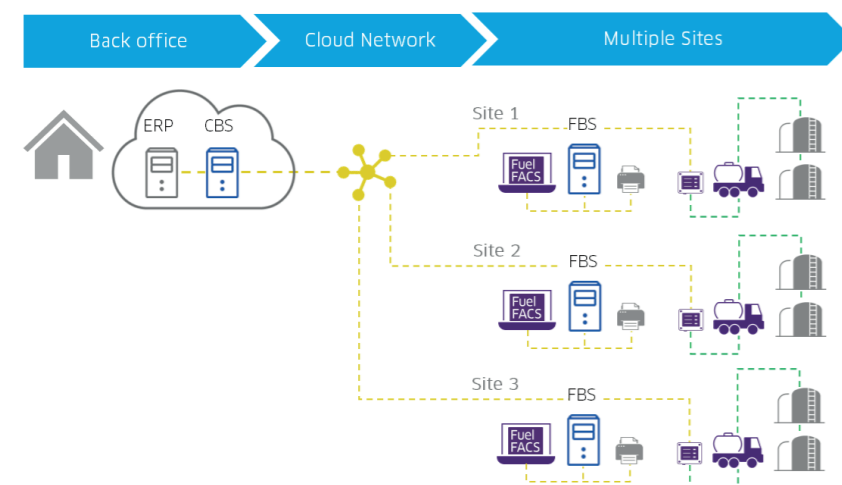

We have re-invented the proven functionality of our on-premises solution to create FuelFACS OnDemand. A unified solution, leveraging cloud-based

architecture that provides multi-terminal support, is secure and easy to access, improves scalability and performance while reducing initial investment and operational costs.

Global support/project management

- ▶ Real-time visibility and control of the enterprise
- ▶ Real-time reporting of product inventories
- ▶ Real-time acquisition, storage and distribution information
- ▶ Cost effective data exchange between the back office and all enterprise constituents

FuelFACS Architecture: FBS and CBS

End-to-end solutions across the value chain

Crude Oil Processing

- ▶ Promass meters
- ▶ Coriolis meters
- ▶ INVALCO turbine meters
- ▶ Electromagnetic meters
- ▶ Vortex meters
- ▶ MPM multiphase meters
- ▶ PADpro and well pad automation
- ▶ Quality measurement units

Crude Oil Transportation

- ▶ Smith Meter PD meters
- ▶ MVTM and Sentry turbine meters
- ▶ Ultrasonic meters
- ▶ ISO 17025 Flow Research and Test Center
- ▶ Promass meters
- ▶ Coriolis meters
- ▶ INVALCO BS&W
- ▶ LACT Units
- ▶ Metering and Proving Systems

Refined Products Transportation

- ▶ Sentry conventional meters
- ▶ Promass X Coriolis meters
- ▶ Flow computers
- ▶ Truck and railcar loading skids
- ▶ Load rack loading skids
- ▶ Supervisory and DCS packages

Marketing Terminals and Biofuels

- ▶ AccuLoad and microload presets
- ▶ Prime4 meters
- ▶ Genesis meters
- ▶ 210 preset valves and strainers
- ▶ Biofuel blending skids
- ▶ Terminal automation systems

Truck and Aviation Distribution

- ▶ Truck meter packages
- ▶ Sening Tank Truck
- ▶ Sening Multi Task
- ▶ Sening TruckEye
